your own smile  
makeover here:

# Invisalign – the world's most advanced clear aligner system.

## Made to move you forward.

Invisalign is the most advanced clear aligner system in the world. Each feature is designed to reveal the smile that you deserve.

Because it's not just your smile that's full of potential.

## Four steps forward. No steps back.

The Invisalign treatment process is as straight forward as it is advanced.

### 1. The Consultation

Once your Invisalign provider has confirmed that you are dentally fit and eligible for the treatment, they will take photos, X-rays and digital scans of your teeth.

### 2. Digital Smile Design

Invisalign Provider will scan your smile and prepare 3D visualisation of your smile after treatment. The simulation will also show you treatment duration and number of aligners needed.

### 3. The Aligners

After being custom-made and shipped to your Provider's office, you'll receive a series of aligners to wear every day and change at home – on average every 1-2 weeks.

### 4. The Results

You'll visit your Provider around every 4 to 6 weeks to monitor progress and receive new aligners. After finishing your treatment plan, retainers will be required to maintain your new smile.
